No. 10788—*R. 3569, dated 6th June 1897.*

The Government of Mysore are pleased to direct that in Sections 6 and 16 of the Special Rules under the Land Improvement Loans Regulation contained in Notification No. 183, dated 21st July 1891 and amended by Proceedings No. 10731-9—R. F. 109-92, dated 20th December 1894, the words "at 3 per cent per annum" be added after the words "with interest" as follows :—

6. "A special annual charge shall be made upon the land assigned as the ayakat (irrigable area) of the well for re-payment of the debt and interest thereon. It shall not exceed Rs. 5 per acre of the irrigable area, and when in arrear shall be recoverable with interest at 3 per cent per annum as an arrear of Land Revenue and also as provided for in these rules."

16. "On receipt of an application, the Amildar shall inspect the land and make summary enquiry in the village as to the correctness of the entries in the application, and shall report whether the land will be commanded by the well; and what will, judging from that of like land in the neighbourhood, be the market value of the land if the well is successful. The report shall be transmitted to the Divisional or other Officer ap-

“pointed for the purpose, who shall examine whether the loan can be made under the rules, and, if no objection is found, shall accept the application and order the Amildar to advance one-third or half the amount of the loan applied for, after taking an agreement from the applicant to the effect that the money received shall be applied to the purpose intended, and that a substantial and properly constructed well in full working order shall be completed within the time allowable for the execution of the work. Such time shall ordinarily be six months, but in case of loans exceeding Rs. 300, the Officer granting the loan may extend it to one year. When the first instalment of the loan advanced is expended, the applicant may apply to have the work measured and estimated, and, if work is found to have been done to the value of the first instalment, a second, not exceeding one-third or half the loan applied for, may be advanced; when work for this amount also has been executed, the remainder of the loan, if any, may be advanced. If, however, it becomes impossible to complete the well within the sanctioned loan, an application for an additional loan may be made after the amount originally applied for and obtained has been fully expended. On receipt of such application, the work done should be measured and the cost estimated. After satisfying himself that the further loan applied for, or a portion of it, is necessary for the proper completion of the well, the Divisional or other Officer appointed for the purpose may sanction the payment of such loan in such instalments as he may deem proper, provided, however, that the conditions of Rules 2, 5 and 6 are not infringed. No interest will be charged on the instalments thus advanced. If default is made in the construction of the well, the amount of the preliminary advances authorized by this rule will be recoverable *with interest at 3 per cent per annum* from the applicant as arrears of Land Revenue. But when the work is not completed, having had to be abandoned owing to causes beyond the applicant's control, such as no water being found, the expenditure incurred shall be borne by Government.”

PUBLIC WORKS.

Notification No. 331—1933, dated 10th May 1897.

The Government of Mysore have been pleased to sanction the following rules for the regulation of House-connections from the Chamarajendra Water-Works within the limits of the City of Bangalore.

By Order,
C. BOWEN, *Colonel,*
Secy. to the Govt. of Mysore, P. W. D.

Rules for the Regulation of House-connections from the Chamarajendra Water-Works.

1. The supply of water from the Chamarajendra Water-Works being intended exclusively for *bona-fide* domestic purposes, the water drawn therefrom, whether from public fountains and taps or from private house-connections, shall not be used for any other purpose whatsoever. A supply of water for domestic purposes shall not include a supply of water for horses or for washing carriages, where such horses or carriages are kept for sale or hire, or a supply for any trade, manufacture or business, or for fountains or for any ornamental or mechanical purpose, or for watering gardens or roads. Water which has been used for washing, bathing or other domestic purposes, may be collected and used for gardening or other non-domestic purposes, but on no account should pure water be drawn from the taps for these purposes. Provided that, with the special permission of the Water-Supply Department, water may be taken from the fountains and hydrants for watering public roads on special occasions.

2. Until further orders, private connections to houses from the Chamarajendra Water-Works will be limited to houses whose annual rental value is not less than Rs. 300 (three hundred), and to localities where the capacity and pressure of the public water-mains permit of such connections being made without detriment to the street service.

3. For every house-connection there shall be provided and maintained in due working order, a water-meter of approved size and description for the accurate gauging of the water consumed.

4. All pipes, taps, water-meters and works required for a house-connection, shall be of such dimensions, character and material, as the Water-Supply Department may approve, and they shall always be under the control of the Water-Supply Department and shall in no way be interfered with by any others, and they shall be provided, renewed and repaired by the Water-Supply Department at the expense of the house-holder applying for, or desiring, the connection, who shall pay in advance the estimated cost. The whole should be fully paid for before the house-connection is permitted to be used.

5. The Water-Supply Department shall determine the size of each house-connection with due regard to the capacity and pressure of the public water-mains of the locality.

6. The house-connection in any case is liable to be stopped or the supply reduced by the Water Supply Department, without any notice or assigning any reason. But when the stoppage is over an extensive tract, or is due to exigencies which are previously foreseen, such previous notice as is possible under the circumstances will be given by the Water-Supply Department. If the Water-Supply Department has reason to believe that wasteful or unauthorized use is made of water drawn from any house-connection, it shall be its duty to stop such connection forthwith under this rule.
